

About License

Online Bonus gives a tenant user the ability of granting free exit to visitors.

Description

Bonus system is a ParkIS module for setting up users who can grant bonuses. Multiple companies are managed by a facility or main admin who can define which companies can grant bonuses. The admin also defines particular Bonus Issuers. Each bonus issuer may have defined up to 5 different bonus items. Each item may be of a different types and different time settings.

Web user with Bonus Issuer rights may grant bonus by simply entering a license plate or the ticket number to the form, selecting bonus type and pressing enter.

Optionally, bonus issuers may have a mandatory reason field for later audits.

The granted bonuses cumulate parking fees for each particular tenant.

Subsequently they are charged by the parking lot owner, usually on monthly basis.

Platform

Web application, submodule of PSP

Prerequisites

ParkIS Main, ParkIS Bonus System

The image shows two overlapping screenshots of the BonusOnline web application. The background screenshot is a browser window displaying the 'Bonus' form. The form has a navigation bar with 'Home', 'Profile', 'Bonus', and 'Tenant A'. The form fields are: 'Card number or license plate' (text input with 'AB123CX'), 'Bonus' (dropdown menu with '60 minut'), and 'Reason' (text input with 'Sony visitor'). A green 'Issue Bonus' button is at the bottom. The foreground screenshot is a 'Parking Info' modal window with a dark blue header. It displays the following information: Date: Sep 15, 2021, 8:41:42 AM; Card: TESTX105QQ54; Arrival: Sep 15, 2021, 8:40:54 AM; Bonus: 60 min; Fee: HUF 0.00.
