

Autopay machine PA-12

PA-12, 1 kind of coin

PA-12, 1 kind of coin, key for staff

PA-12, 1 kind of coin, RFID card for staff and subscribers

PA-12, more kinds of coins, no coinchange, LCD display, RFID card for staff and subscribers

Machine is for paid access through turnstiles or door with an electric lock for example to sporting events, to the public sanitary facilities (toilets) at petrol stations, railway and bus stations, hospitals, shopping and tourist centers, restaurants... After payment of the required sum of money coin / coins a receipt is printed that serves as a voucher to obtain discounts on the price of goods or services in the facility listed on that bill. In the more affordable version for the payment of one kind of coin machine may also receive other kinds of coins above, the value is recorded in the revenue, but machine is not giving change. Subscribers can use tokens or RFID cards. When the failure of the machine as a result of a full stack of coins or the lack of paper in the printer occurs a turnstile and door can be released for a free passage. Autopay machine has well-arranged indicator and LED pictograms for a quick visitor's orientation. Other configurations of autopay machine are possible, for example. acceptance several kinds of coins, coin dispensing, printing a document when withdrawal, ability of reporting of withdrawal amounts via internet or via SMS. State of pay machine and turnstile / doors can be presented in acoustic-optical form at the operator desk.
